INTRODUCTION

2019

The Intex Family of companies is dedicated to developing and manufacturing the highest quality products that not only provide the best value in price, but are innovative, fun and exciting. Backed by excellent Customer Service, Intex also provides first-rate after sales support. The 100+ independently owned and locally operated companies that make up the Intex Family, all embrace this commitment to quality, service and price and are committed to working together to ensure the satisfaction of the families and individuals in countries across the globe who enjoy these products. This has become the hallmark of Intex around the world.

As a true industry leader, Intex boasts state of the art factories, trained and motivated people, products that meet rigorous testing requirements, and a Customer Service organization that will go extra lengths to ensure our customers are satisfied and happy with their purchases.

When you purchase an Intex product you can be confident that you are buying the best product, at the best price, backed by the best Customer Service organization in the industry.

Intex is committed to delivering top quality products at a great value with the backing of a responsive Customer Service organization. Our Airbed line is unmatched for breadth and beauty. With the introduction of our new innovative, patented Fiber-Tech™ Technology, we have engineered a way to combine durability with exceptional comfort, creating airbeds that rival the stability, support and comfort of a traditional mattress. The “Dura-Beam®” series utilizes superior Fiber-Tech™ interior construction to create a line of airbeds that are lighter, stronger, and more comfortable than an average airbed. With “PremAire®”, Intex has combined our manufacturing technologies with our engineering strengths of Fiber-Tech™ to bring you the most innovative, luxurious, and comfortable bed in the market today.

Our Comfort Rest® line of airbeds consists of four series designed to meet all of your customers' needs: the “Dura-Beam® Standard Series” offers a line of durable and comfortable airbeds with attractive opening price points. “Dura-Beam® Plus Series” features a wide variety of luxurious premium quality raised airbeds. Each airbed has been engineered and tested to provide you with superior functionality that guarantees the ultimate sleeping experience. Our top-of-the-line “PremAire® Airbeds” bring a new level of luxury and innovation to our collection. Elegantly designed with puncture resistant laminated PVC exterior, plushy pillow top and superb structural durability, PremAire® Airbeds bring you and your guests unparalleled comfort. The “Multi-Use / Camping” series is engineered for camping, travel, and all-around rugged use, with beds perfectly suited to the outdoor environment. And for the young at heart, our “Air Furniture” series comes with bright colors and fresh design concepts, guaranteed to attract a loyal following of young adults! Ask your Intex representative for any of our product catalogs – we are confident that you will agree that Intex's product line is unmatched in meeting your needs.

Commitment to Excellence

Intex's Commitment to Excellence encompasses every single product that leaves our factory. We achieve this by maintaining the highest levels of quality assurance — such as inflating and testing every single airbed to ensure the Air Lock® guarantee. It's that simple.

100% of our products are quality tested to be air tight before they leave our factory.

In today's rapidly evolving and highly competitive environment, this translates into a total commitment to product quality, including conformity to all relevant safety & quality regulations and standards. Examples include:

- EN 16927, Safety and test methods for mini pools (European standard)
- EN 16582, Safety and test methods for domestic swimming pools other than mini pools (European standard)
- Regulation (EC) No.1907/2006 "Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)"
- EN 71 "Safety of toys" (European standard)
- EN 13138 "Buoyant aids for swimming instruction" (European standard)
- EN15649 "Floating leisure articles for use on and in the water" (European standard for air mats, lounges and other similar items)
- EN 60335-2-41 "Safety of household and similar electrical appliances, particular requirements for pumps" (European standard for water pumps)
- ISO 6185-1 "Inflatable boats" (International standard for Sports Boats)
- NMMA-ABYC (USA standard for hi-end sports boats)
- ASTM F963 "Standard Consumer Safety Specification for Toy Safety" (USA toy standard)
- ANSI/APSP-4 "AGP standard" (USA standard for above ground pools)
- CPSIA "Consumer Product Safety Improvement Act" (USA regulation of consumer and children's products)

- ASTM F2666 "Small pools standard" (USA standard for pools under 36" water depth)
- UL1450 "Electric inflators" (USA standard for electric inflators)
- UL1081 "Swimming pool pumps, filters and chlorinators" (USA standard)
- UL1563 "Electric Spas" (USA standard for Spa)

Intex's Commitment to Excellence extends to helping our environment and supporting the ecosystem. It begins with product design. Intex's filter pumps operate on much lower amps than most filter pumps in the market, reducing electricity consumption. Our saltwater systems clean pools using only natural salt, eliminating the ongoing need for environmentally unfriendly packaged chlorine.

Intex also operates one of the most comprehensive recycling programs in the industry. We are one of the earliest companies in China to successfully obtain a license to ship consumers' returns in the original package back to China to be recycled. Therefore, used materials and product returns are prevented from going to landfills and instead re-used in the manufacturing process where up to 10% of annually produced PVC is recycled.

Intex designs all of our own packaging for our products. We constantly challenge our methods of packaging to improve

efficiency and reduce waste. More compact packaging techniques save cardboard while cutting down on space utilization, saving freight and fuel consumption.

As a manufacturer, Intex knows it has a responsibility to manage the amount of waste produced. As an employer of over ten thousand people, we also encourage our own employees to recycle, reduce waste, and be conscious of the environment. Starting from recycling corners for all our worldwide office facilities, our factory has worked with the local government as well as through sponsorships with key partners to strengthen our efforts to be more eco-friendly. Intex has worked to provide incentives and seminars to employees as well as setting targets to reduce energy consumption. In addition, Intex has made significant investment in technology to achieve these goals. For example, we have implemented a frequency converter system which converts diesel to natural gas, installed solar water heaters and set up a recycled sewage system, and invested in equipment that reduces gas emissions.

From product design, to more efficient processes that save energy and reduce waste, to a world class recycling program, to more energy efficient offices, the people at Intex are striving to provide the best value products anywhere while constantly keeping our global ecosystem in mind.

INTRODUCING
FIBER-TECH™ TECHNOLOGY
 by INTEX®

Designed for Comfort
 Engineered for Durability

High-Strength Polyester Fibers

Fiber-Tech™ Interior Construction

I-Beam Interior Construction

An Incredible Night's Sleep Starts With a Single Thread...

CONTOURED SUPPORT SYSTEM

Our innovative, patented Fiber-Tech™ Technology airbeds are comprised of thousands of high-strength polyester fibers. Unlike traditional airbed construction, these high-strength polyester fibers do not stretch over time, resulting in amazing durability for years of lasting comfort. Fiber-Tech™ interior construction provides the ideal firmness for superb support and rejuvenating sleep.

FIBER-TECH™
 TECHNOLOGY

Standard interior construction has been enhanced with lightweight, high-strength fibers for amazing durability and comfort!

U.S. Patent No. 8,562,773 / U.S. Patent No. 9,156,203 /
 U.S. Patent No. 9,802,359

PVC I-Beam Stretches

Fiber-Tech™ Beam Doesn't

Great Sleep Made Simple

Our Dura-Beam® Standard airbeds with Fiber-Tech™ Technology are perfect for short-term usage while providing an affordable sleep solution to any indoor or outdoor occasion. Our airbeds feature Fiber-Tech™ interior construction with vertical beams with a bed height ranging from 10 inches to 20 inches high from the floor, making it easy to get in and out. These airbeds are ideal for traveling, camping, and for accommodating overnight guests.

A NEW DIMENSION OF LUXURY

PremAire®

Elevated Series
with Fiber-Tech™ Technology

Our luxurious, innovative PremAire® line is expanded with exciting new additions.

All PremAire® airbeds are built with our patented and award winning Fiber-Tech™ Technology, offering superb structural stability and support. The high strength fibers provide an interior with amazing durability and unmatched comfort. Each PremAire® mattress is covered in either a pillow top or Microcell™ contour top, ensuring true comfort and promises a great night's sleep. The laminated PVC exterior provides a high quality puncture resistant surface that offers unrivaled resilience and durability.

The bed's elevated height makes it easier to get in and out of each morning. For extra convenience, this bed comes with a powerful built-in electric pump for fast inflation and deflation. Our revolutionary PremAire® mattress offers the perfect combination of luxurious comfort and best-in-class durability.

MICROCELL™
CONTOUR TOP

Warm when Cool. Cool when Warm.

- breathable
- warms
- wicks
- contours

The extra soft tri-layer weave insulates in cold weather and wicks moisture in warm humid weather, providing true 4 season comfort.

Breathable polyester material insulates during cold weather to help you stay warm, and it absorbs moisture on warm nights to help you stay cool.
